

## Fraser Island

### Description

Located east of Brisbane, Australia - Fraser Island is a UNESCO World Heritage Site renowned for its eco-diversity. The island hosts rainforests, eucalyptus woodlands, mangrove forests, wallum swamps, and dunes along its coasts. This popular tourist destination is relatively tiny, only 123 kilometers long and 22 wide. But what draws attention to its home in the Coral Sea is the sheer amount of differing, diverse life for which the island provides a home.
